Create The Perfect Mood With Accent Colors

THESE COLOR CHOICES ALSO INVITING KIDS TO COME PLAY

One of the easiest ways to liven up your home is with accent colors and matching accent decorations. Accent colors are used to help give a room a pop, to blend the color scheme together, and most importantly, to decide the mood of the entire room.

Using accent colors is about two things: choosing a mood that you want to provoke and choosing where you want the attention of your guests to be drawn to.

In the above picture, the homeowners chose red and pink to give the room a playful and energetic vibe by picking two pink and red decorative toys. These color choices enhance the clean strong lines of the room while also inviting kids to come play. This type of subtle invitation can be done with small accent items such as picture frames and pillows.
